

I.T.S Dental College, Hospital & Research Centre

47, Knowledge Park- III, Greater Noida

5.1.4 Institute has an active international cell to facilitate study in India program

The institute is in process of making an international cell which would be called "knowledge transfer partnership" to facilitate student exchange programs so as to bring about global, holistic & intercultural modes into modern day educational system.

In retrospect we have had student exchange with foreign top notch universities like Leeds, UK, Hansa Dont Orthodontics studio Hungary , Tufts school of dental medicine, Boston USA.
